large boulders to be used as retaining walls on embankments, to prevent car movements and as ornamental within planting.

cluster of white trunk eucalyptus trees to create a gateway on either side of the main road, black trunk eucalyptus trees to be used further away in 'C' zone as a feature.

assorted indigenous planting to be used for habitat, interest, bee and bird food and reduce weed infestation.

swathes of low planting along roadsides

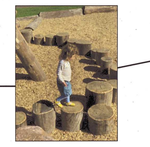
possible sculpture from old log

boundary fencing to be a continuous fence using a combination of fencing materials. suggestions of fencing to be timber uprights, timber with steel inserts, steel bollards, rock etc.

timber for fencing to come from the reusing of the pine trees branches and milling of the trunks to create a natural effect. Post and rail fence to north of continuous fence can be made from milled 125 x 125mm posts

large basalt rock to be used for fencing, play space, meeting place seating and to soften the edging of the gardens.

play space to reuse the trees to be removed by turning them into log steppers, balance beams, tee pees and sculptured play items.



allocasuarina forest to have log steppers and bollards to create a natural hide and seek area to explore.

areas to be incorporated to allow for natural play spaces such as the raingarden overflow, rockwork and moundling of soil.

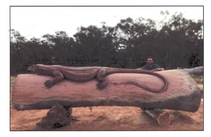
timber boardwalk to allow for natural drainage underneath.

bench seating

timber seating

assorted pine trees to be removed from site and milled for use on the project.

assorted pine trees to be carved into seating and other decorative sculptures.



suggestions for carvings to make use of the pine trees depending on the quality of the timber

Kilmore Trackside in Mitchell Shire have recently had carvings created from pine tree stumps

many ideas can be incorporated into this area to reflect the cultural and environmental feel of Eltham.

LEGEND

- existing site tree locations
- proposed location of new native and indigenous trees
- proposed location of swales of new native planting
- proposed location of large basalt rocks for retaining, edging of paths and seating
- structured/organised indigenous planting
- revegetation indigenous natural planting
- edible indigenous planting
- granitic sand pathway
- pine tree stumps for potential removal or use in the landscape as sculpture depending on the quality of the timber
- log steppers and balance logs from milled removed assorted pines
